

The Clipper AGM 224 is a small cleaner designed to meet the low maintenance and easy cleanout requirements of today's seedsman. The 224 shoe has been designed with two 24-1/2" x 22- 1/4" screens. One screen for the top and the other for lower separation. Over 150 different sizes of perforated metal or wire cloth screens are available. The commodity is fed into the hopper and the adjustable gate helps to spread product evenly across the full width of the top screen. The product then moves across the top screen, which has openings larger than the product itself. The large foreign

material is "scalped" off while the good product falls through the screen. The bottom screen is set up for sifting. The bottom screen openings must be smaller than the commodity being cleaned.

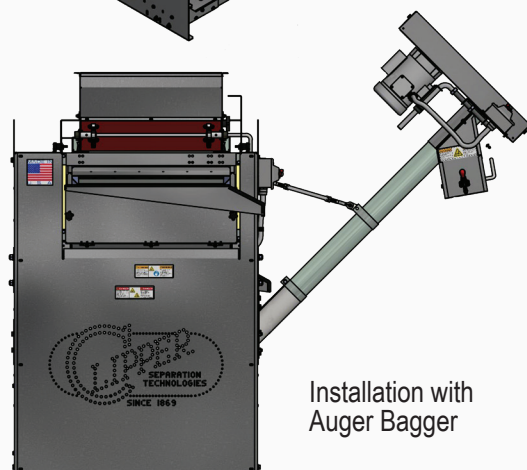

Trash, weed seeds and splits drop through the bottom screen while the good product passes over it. Next, the product is routed through a column of air from the bottom blast fan. This blast of air effectively removes any light-weight trash and dust that may have remained after screening. Good clean product is discharged at the bottom of the air chamber.

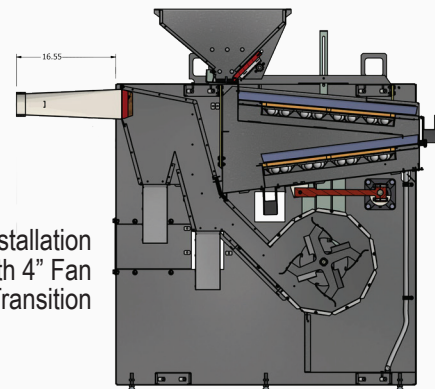

Installation  
with Dust  
Control Box

Installation with  
Surge Hopper  
and 24" stand

Installation with  
Auger Bagger

Installation  
with 4" Fan  
Transition

### STANDARD FEATURES:

- Inlet Feed Hopper
- Heavy Duty Eccentric Shaft And Drive
- Scotch-Ply Shoe Hangers
- 2 Screens 24-1/2" x 22-1/4" Flows included: scalp, sift
- Ball Tray Screen Cleaning
- Adjustable Bottom Air - Bottom Cleanout Air Door
- 1 Hp, 60 Hz, 1800 RPM, TEFC, 1 Phase 115/230 Volt Motor And Drive

### OPTIONS:

- 50 Hz 220 Volt Motor Package
- Inlet Surge Hopper
- Clean Seed Discharge Auger with 2 Way Bagger and Drive
- 24" stand available to elevate cleaner

### CAPACITIES:

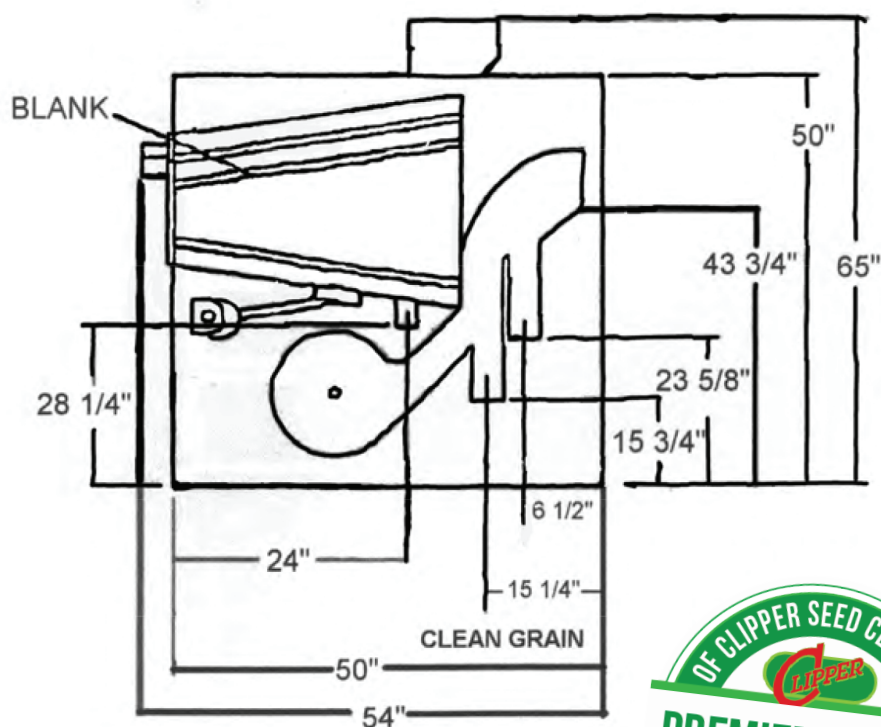

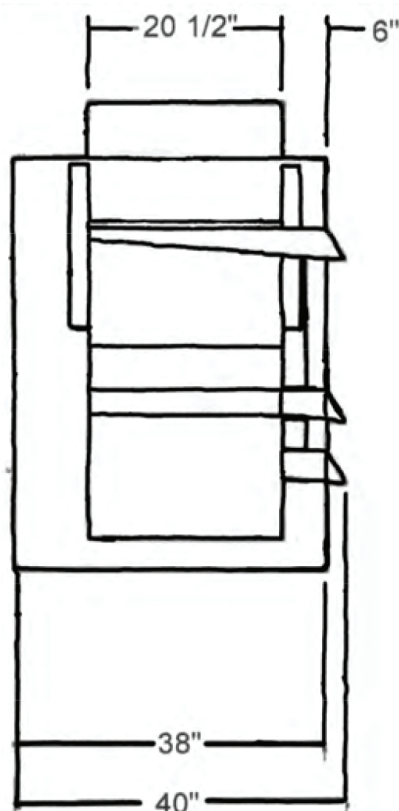

COMMODITY	FAST CLEAN	PRECISION CLEAN
Soybeans, wheat, corn	*50 BPH	*30 BPH
Rice, oats	*40 BPH	*25 BPH

BPH = bushels per hour

\* Note: capacities may vary depending on seed condition, moisture content, seed varieties, types, and volumes of contaminants to be separated and the percentage of foreign material acceptable in the final product. Capacities also vary depending on product flow through the cleaner. Capacities shown above are for the split flow arrangement.

### DIMENSIONS:

Clipper offers over 175 different sizes of perforated metal or wire mesh material to accommodate virtually all agricultural commodities
