

CONVEYORS

Forsberg's Natural Frequency Conveyors feature a transient oscillating suspension design coupled with an exciter drive which allows maximum efficiency and durability.

This produces a motion that moves material gently without hindrance or repression, keeping abrasion or breakage to a minimum.

Forsberg's conveyors are manufactured out of carbon steel or stainless steel for your specific need and application.

FORSBERGS, INC.

APPLICATIONS:

- Peanuts - in shell, out of shell
- Almonds
- Crumbled Glass
- Shredded Copper wire
- Flakes
- Plastic
- Seeds
- Rice
- Wood chips
- Compost
- Crumb rubber
