

LMC Sizing Shakers are used to separate dry, flowable products by specific size. Their sizing shakers have proven themselves over the years by separating products such as peanuts, almonds, beans, and much more. The machines are counter-balanced, which allows smooth operation and long life.

LMC's sizing shakers are capable of removing large objects like sticks and hulls and small particles such as fines and pieces.

SIZING SHAKER SCREENS:

The screens of a typical LMC sizing shaker can be changed in only a few minutes, reducing downtime and increasing your plant's efficiency. Since they manufacture their own screen, they can be configured for any sizing operation, Optional ball trays minimize screen blinding for maximum screen efficiency.

SIZING SHAKER OPTIONS:

- Single deck
- Parallel deck
- Reverse flow deck
- Double flow deck
- Stick removal units available
- Shaker/aspirator combinations available
- Quick change screens
- Various widths available (24", 36", 48" 60", 72", and 84")
- Various deck angles available (5 deg., 8deg., 10 deg., 12 deg., and 15 deg.)
- Stainless Steel contacts available

INDUSTRIES THAT USE LMC'S SHAKERS

Peanuts
Tree Nuts
Seed & Grain
Recycling
