

OPEN SPIRAL SEPARATOR

Portable and profitable. The Open Spiral easily separate good seed from splits, weed seed and chaffs based on their shape and size.

14-16 gauge galvanized steel ensures rugged durability; they are configurable from one to twenty four core units, and can grow and change in response to your operation's needs.

Spiral uses include separating good seed from splits, weed seed, chaff, hulls, stems, etc. Spirals are also used to separate seeds of one kind from another depending on their shape and size.

Cleans Soybeans, Corn, Canola, Mustard, Peas, Vetch, Wheat, Rye, Barley, Oats, Flaxseed, Coriander, Peas, Millet, Milo, Alfalfa, Peppercorn, Ceramic & Glass Beads, Powder Metals, Steel Shot, Spherical Solder, Plastics, Proppant, Electronics, Minerals, Recycling & more.

- Galvanized steel construction
- 4 turns of separation
- Adjustable flow control
- Easy access to clean and sanitize

Dimensions

20" x 20" x 72"

Shipping Weight

250 lbs.

profile⁺
INDUSTRIES

Optional Features

- Stainless steel construction
- Stainless steel flights
- 14 unique flight geometries
- Discharge adaptors
- Self-cleaning hopper insert for double spirals

Material

Galvanized Steel

Power

None Required
