

The best densimetric separation for agro-industrial processes, benefiting grain, cereals, and seeds!

The SuperBrix table separator is the only one in the market incorporating 7-decks and a compact design, sorting grain and cereals of different densities with exceptional results. Additionally, it sorts grain with minimum differences and specific gravitations, not detected by traditional methods.

ENSURES AN EFFICIENT SEPARATION OF MULTIPLE PRODUCTS SUCH AS:

Rice

Oatmeal

Sunflower Seeds

Malted Barley

Wheat

Rye

and other industries with densimetric or gravimetric classification needs.

### CAPACITY IN RICE:

Model	Capacity	Installed Power
SB 40	2.7 MTH	5 HP - 3.7 kW
SB 60	4.0 MTH	5 HP - 3.7 kW
SB 70	4.7 MTH	7.5 HP - 5.5 kW
SB 80	5.4 MTH	7.5 HP - 5.5 kW
SB 105	7.1 MTH	7.5 HP - 5.5 kW

### CAPACITY IN OTHER CEREALS:

Product	Kg / Cell / h
Oatmeal	70 - 80
Malt barley	80 - 90
Rye	100 - 120
Wheat	110 - 120

## FEATURES:

1790 mm  
All the models

Dust and noise free operation

Individual adjustment of hammers and mesh for cleaning impurities at the entrance

99% separation efficiency, avoiding rework and damage to the final product.

SB 40 1920 mm  
SB 60 1950 mm  
SB 70 2100 mm  
SB 80 1950 mm  
SB 105 2100 mm

Greater capacity and reduction of broken kernels

Tilt and stroke control for higher capacity and set-up

SB 40 2020 mm  
SB 60 2940 mm  
SB 70 2840 mm  
SB 80 3860 mm  
SB 105 3640 mm

### FLAWLESS RESULTS

The separator table SB uses a single inlet with two product outlets; A high percentage of heavy and light grain is separated, avoiding reprocessing the product and improving grain condition.
