

The Clipper Micro Debearder is a multi-purpose machine available with various motor sizes and voltages along with optional variable speed controls to handle a wide variety of jobs with ease. The Clipper Debearder originally designed to debeard barley has become one of the most versatile machine in the entire Clipper line. The Debearder Micro incorporates improvements such as increased drum material thickness, hardened hammers, and a new style machined stress proof drive shaft. The Clipper Micro Debearder is the perfect complement to the Eclipse 324 & 334 Seed Cleaners.

STANDARD FEATURES:

- Heavy duty ten gauge steel housing
- New style machined stress proof drive shaft
- 4.75" square inlet, larger than competition
- Interchangeable heat treated hammers, round on housing, square on center shaft
- Pneumatic clean out along with one top inspection door
- Various size motors and voltages with a HTD belt drive
- Variable speed option available
- New style heavy duty base with lift slots for handling by forklifts
- Discharge gate with adjustable weights
- Built in discharge aspiration connection

CAPACITIES:

* 60 to 150 BPH

* **Note:** depending on drive and gate setup

OPTIONS:

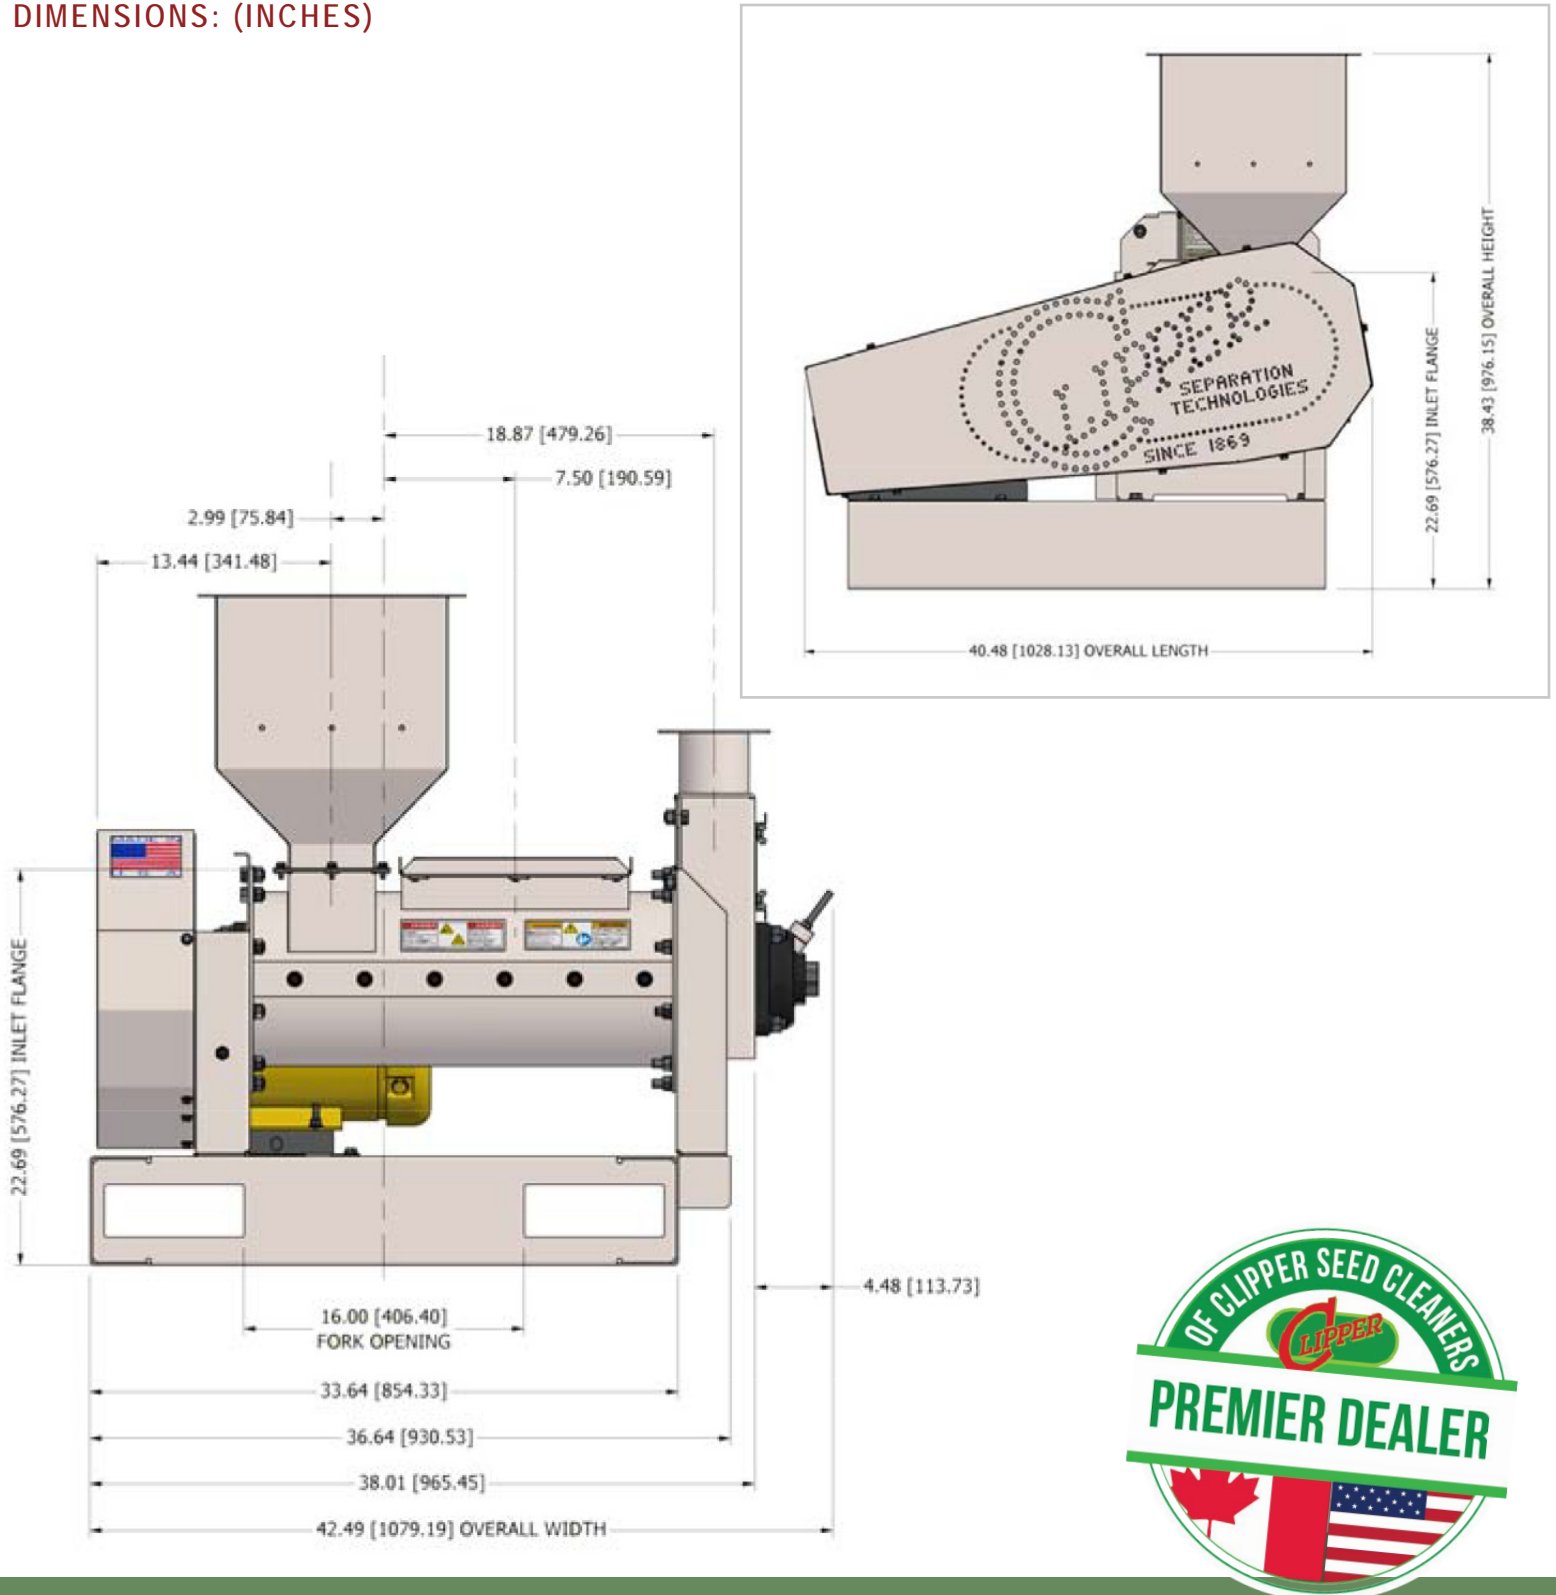

- Inlet Surge hopper
- Stationary round or square hammers on housing
- Variable speed drive, 50 or 60 Hertz.
- Various stands to match the Micro unit up to either Eclipse 324 or 334 to make a combination unit

APPLICATIONS:

- Debeard barley to improve test weight
- Hull "white caps" in wheat
- Clip oats to remove excess fibres, increase test
- Polish tomato seed, remove mold from pepper weight, enhance appearance and cleaning ability balls, coffee beans and cassia (cinnamon) bark
- De-awn bronco grass (in oats), dill seed, celery seed
- Break up alfalfa pods, grass clusters, flax balls
- Break up Spelt Clumps crested wheat, fescues, brome, and cassia bark
