

The Clipper Eclipse 324 is a small cleaner designed to meet the low maintenance and easy cleanout requirements of today's seedsman. The Eclipse is built with the same care and craftsmanship as Clipper's larger precision cleaners.

COMMODITY FLOW:

The commodity is fed into the hopper and is spread evenly across the full width of the top screen. The product then moves across the top screen, which has openings larger than the product itself. The large foreign material is "scalped" off while the good product falls through the screen.

The bottom two screens are set up for split flow sifting. The bottom screen openings must be smaller than the commodity being cleaned. Trash, weed seeds and splits drop through the bottom screens while the good product passes over them.

The bottom two screens can also be set up as a scalp/sift flow by removing and replacing some internal blanks. Next, the product is routed through a column of air from the bottom blast fan. This blast of air effectively removes any lightweight trash and dust that may have remained after screening. Good clean product is discharged at the bottom of the air chamber.

STANDARD FEATURES:

- Tubular Steel Frame
- Inlet Feed Hopper
- Heavy Duty 1-1/2" Eccentric Shaft, Drive and Counterbalance.
- Scotch-Ply Shoe Hangers
- 3 Screens 24-1/2" x 22-1/4" Flows included: scalp, scalp, sift or scalp, split-sift
- Ball Tray Screen Cleaning
- Adjustable Bottom Air - Bottom Cleanout Air Door
- 1 Hp, 60 Hz, 1800 RPM, TEFC, 1 Phase 115/230 Volt Motor and Drive

CAPACITIES:

COMMODITY	FAST CLEAN	PRECISION CLEAN
Soybeans, wheat, corn	*80 BPH	*60 BPH
Rice, oats	*55 BPH	*35 BPH

Note: *Capacities may vary depending on seed condition, moisture content, seed varieties, types and volumes of contaminants to be separated and the percentage of foreign material acceptable in the final product.
